

COMPREHENSIVE LONG-TERM ENVIRONMENTAL ACTION NAVY (CLEAN I)
Northern and Central California, Nevada, and Utah
Contract Number N62474-88-D-5086
Contract Task Order No. 0283

Prepared For

DEPARTMENT OF THE NAVY
Roy Santana, Remedial Project Manager
Engineering Field Activity West
Naval Facilities Engineering Command
San Bruno, California

FINAL REPORT
RCRA FACILITY ASSESSMENT
CONFIRMATION STUDY
NAVAL WEAPONS STATION CONCORD, CALIFORNIA

August 8, 1997

VOLUME 2 OF 2

Prepared By

PRC ENVIRONMENTAL MANAGEMENT, INC.
135 Main Street, Suite 1800
San Francisco, California 94105
(415) 543-4880

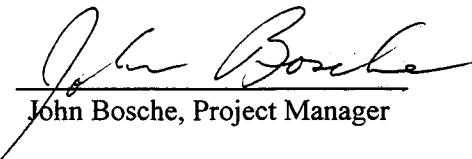

John Bosche, Project Manager

TABLE 1
SOIL SAMPLING DEPTHS AND ANALYSES
NAVAL WEAPONS STATION CONCORD

SWMU	Building	Boring	Sample Depths (ft.)	Analyses Performed (in 1 or more samples)
1	IA-6	01-01	0.5, 5, 10.5, 15	O&G, TPHd, TPHmo, VOCs
		01-02	5, 10, 15	O&G, TPHd, TPHmo, VOCs
		01-03	5, 10, 15	O&G, TPHd, TPHmo, VOCs
		01-04	3, 9, 13.5	TPHd, TPHmo, BTEX
		01-05	3, 9, 14.5	TPHd, TPHmo, BTEX
		01-06	3, 10	TPHd, TPHmo, BTEX
2	IA-7	02-01	0, 3	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-02	0.2, 4.5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-03	0.5, 4.5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-04	0.5, 4	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-05	0.3, 4.5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-06	0.3, 4.5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-07	0.5, 4.5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-08	0, 5	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-09	4.2, 4.5, 5.0	TPHd, TPHmo, TPHg, BTEX, metals, anions, carbonates
		02-10	0, 2.5, 6	TPHd, TPHmo, TPHg, BTEX
		02-11	0, 2.5, 6.5	TPHd, TPHmo, TPHg, BTEX
		02-12	0.5, 2.5, 6.5	TPHd, TPHmo, TPHg, BTEX, VOC, SVOC, metals
		02-13	0, 2, 6	TPHd, TPHmo, TPHg, BTEX
		02-14	0, 2, 7	TPHd, TPHmo, TPHg, BTEX
5	IA-12	05-01	5.5, 10.5, 15.5, 20.5	metals
		05-02	6, 11, 16, 21, 26	TPHd, TPHmo, TPHg, BTEX
		05-03	5.5, 10, 15.5, 20.5	TPHd, TPHmo, O&G, VOCs, SVOCs, metals
		05-04	6, 11, 16, 21	TPHd, TPHmo, O&G, VOCs, SVOCs, metals
		05-05	0, 6	TPHd, TPHmo, O&G, BTEX
		05-06	1, 6	TPHd, TPHmo, O&G, BTEX
		05-07	1, 5.5	metals
		05-08	0.5, 4.5	metals
7	IA-16	07-01	0.5, 4.5	VOCs, metals
		07-02	1, 6	VOCs, metals
		07-03	0.5	VOCs, metals
		07-04	1	VOCs, metals
		07-05	1.5	VOCs, metals
		07-06	6, 11, 16	VOCs, metals
		07-07	6, 11, 16, 21, 26	TPHd, TPHmo, TPHg, BTEX
		07-08	6, 11, 16, 21, 26	TPHd, TPHmo, TPHg, BTEX
		07-09	6, 11, 16, 20.5, 25.5	TPHd, TPHmo, TPHg, BTEX
		07-10	0.5, 3, 8, 14	metals
		07-11	0.5, 13	TPHd, TPHmo, BTEX
		07-12	9, 19.5	TPHd, TPHmo, BTEX, metals
		07-13	9.5, 14.5, 21.5	TPHd, TPHmo, BTEX
12/20	IA-24 A-55	12/20-01	5, 11, 15	VOCs, SVOCs, O&G, metals
		12/20-02	5, 10	VOCs, SVOCs, O&G, metals
		12/20-03	5, 10, 15	VOCs, SVOCs, O&G, metals
13	IA-25	13-01	5, 10, 15	VOCs, SVOCs, O&G, metals, pesticides/PCBs, explosives
		13-02	5, 10.5, 15.5	VOCs, SVOCs, O&G, metals, explosives
		13-03	0, 3	VOCs, SVOCs, O&G, metals, pesticides/PCBs, explosives
14	IA-27	14-01	5, 10, 16	VOCs, SVOCs, O&G, metals
		14-02	5.5, 10.5, 16	VOCs, SVOCs, O&G, metals
15	IA-41	15-01	0.5, 6	VOCs, SVOCs, metals
		15-02	1, 5	VOCs, SVOCs, metals
		15-03	0.5, 4	VOCs, SVOCs, metals

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Notes: U = Not detected with detection limit indicated, J = Estimated value, -- = Not analyzed

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

α = Detected concentrations greater than the U.S. EPA National ambient water quality criteria, saltwater aquatic life protection, continuous concentration (4-day average) July 1995 and May 1991.

β = Detected concentrations greater than the U.S. EPA National ambient water quality recommended criteria for marine chronic aquatic life protection. May 1991.

Notes: U = Not detected with detection limit indicated, J = Estimated value, -- = Not analyzed

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

α = Detected concentrations greater than the U.S. EPA National ambient water quality criteria, saltwater aquatic life protection, continuous concentration (4-day average) July 1995 and May 1991.

§ = Detected concentrations greater than the U.S. EPA National ambient water quality recommended criteria for marine chronic aquatic life protection. May 1991.

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Notes: U = Not detected with detection limit indicated, J = Estimated value

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Notes: U = Not detected with detection limit indicated, J = Estimated value, -- = Not analyzed

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

^a = Detected concentrations greater than the U.S. EPA National ambient water quality criteria, saltwater aquatic life protection, continuous concentration (4-day average) July 1995 and May 1991.

^b = Detected concentrations greater than the U.S. EPA National ambient water quality recommended criteria for marine chronic aquatic life protection. May 1991.

Notes: U = Not detected with detection limit indicated, J = Estimated value

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Notes: U = Not detected with detection limit indicated, J = Estimated value

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

T = Detected concentrations greater than the ambient metals concentrations in soils.

Notes: U = Not detected with detection limit indicated, J = Estimated value

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

α = Detected concentrations greater than the U.S. EPA National ambient water quality criteria, saltwater aquatic life protection, continuous concentration (4-day average) July 1995 and May 1991.

§ = Detected concentrations greater than the U.S. EPA National ambient water quality recommended criteria for marine chronic aquatic life protection. May 1991.

Notes: U = Not detected with detection limit indicated, J = Estimated value, -- = Not analyzed

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Inorganic results less than 10 are reported to two significant figures and results greater than 10 are reported to three significant figures.

Organic results less than 10 are reported to one significant figure and results greater than 10 are reported to two significant figures.

* = Detected concentrations greater than preliminary remediation goals (PRG) for residential use.

= Detected concentrations greater than the effects range medium (ERM) guideline values (Long et. al. 1995).

! = Detected concentrations greater than the effects range low (ERL) guideline values (Long et. al. 1995).

Selenium	DL ^d	DL ^d	DL ^d	380
Silver	DL ^d	DL ^d	DL ^d	380
Thallium	DL ^d	1.4	1.4	5.4 ^g
Vanadium	86	95	86	540
Zinc	83	99	180	23,000

Notes: Shaded areas in the above table indicate estimated ambient limit concentrations that exceed the residential PRG.

a Estimated ambient limit concentrations are statistically calculated to be equal to 80 percent of the lower confidence limit on the 95th percentile of the ambient data set. Some of the ambient data sets consisted of both detected and nondetected results. Nondetected results were represented by values of one half the detection limit. The estimated ambient limit concentration calculations excluded anomalously low and high values from each data set.

b U. S. EPA preliminary remediation goals for residential use (EPA 1995).

c The residential PRG is the California Modified PRG (EPA 1995).

d The estimated ambient limit concentration was set at the detection limit (DL).

e Represents the PRG for total chromium (assumes a 1/6 ratio of chromium VI to chromium III).

f Represents the PRG for mercuric chloride.

g Represents the PRG for thallic oxide.

TABLE 32
SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS
NAVAL WEAPONS STATION CONCORD

SWMU SITE	CONCLUSIONS AND RECOMMENDATIONS
1	The site should be transferred to the Navy's UST program and the SWMU site should be removed from the RCRA corrective action program because hazardous constituents were not detected in soil and there is no evidence of a release of hazardous materials from the site. A CERCLA process investigation is recommended at SWMUs 2, 5, 7, and 18 to determine the source of VOC chemicals detected in groundwater at SWMU 1 and to evaluate remedial alternatives for the area.
2	Hydrocarbons were detected sporadically in soil samples and were also detected in groundwater samples. However, the hydrocarbons in groundwater are not related to soils containing hydrocarbons at this SWMU site because hydrocarbons have not been found in soil near the groundwater table. Remediation of sporadic detections of hydrocarbons in soil is unnecessary because the hydrocarbons were not detected at concentrations that threaten human health or the environment. There is no evidence of site activities that have caused or contributed to the hydrocarbons detected in groundwater. Groundwater at SWMU 2 should be investigated under a CERCLA process investigation of SWMUs 2, 5, 7, and 18 to determine the source of chemicals in groundwater and to evaluate remedial alternatives.
5	Hydrocarbons and low concentration VOCs were detected in groundwater samples. The site should be investigated under a CERCLA process investigation to determine the source of contamination in groundwater and to evaluate remedial alternatives.
7	The four USTs should be removed under the Navy's UST program (including soil and groundwater remediation as necessary). The VOC contamination of groundwater should be investigated under a CERCLA process investigation of SWMUs 2, 5, 7, and 18 to determine the source of contamination in groundwater at SWMU 7 and to evaluate remedial alternatives.
12/20	SWMU 12/20 is located in the vicinity of installation restoration (IR) Site 17. Manganese and thallium were detected in one soil sample exceeding the PRGs. However, soil containing manganese and thallium are limited in lateral extent and were deeply buried. There is no pathway for human or environmental exposure to these constituents. Elevated concentrations of manganese and thallium were not detected in soil samples collected at IR Site 17. The concentrations of VOCs detected at SWMU 12/20 were low and did not exceed PRGs (when applicable). Because hazardous constituents are not a threat at the site, and because there is no known source for these constituents, the SWMU site is recommended for no further action under the RCRA corrective action program.
13	Hazardous waste present in the septic tank was removed under an interim RCRA corrective action. There is no evidence of potentially harmful concentrations of hazardous materials present at the site. The SWMU site does not pose significant threat to human health or the environment, and is recommended for no further action under the RCRA corrective action program. Building IA-25 located adjacent to SWMU 13 has been identified as an area of potential environmental risk requiring further evaluation. Therefore, a CERCLA process or investigation of Building IA-25 is recommended.

TABLE 32 (Continued)

SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS
NAVAL WEAPONS STATION CONCORD

SWMU SITE	CONCLUSIONS AND RECOMMENDATIONS
14	The nickel detected in soil is deeply buried and generally does not exceed the PRG by a significant amount. As such, the SWMU site poses no threat to human health and the environment. The SWMU site is recommended for no further action under the RCRA corrective action program.
15	Barium, manganese, and thallium were detected in one soil sample at potentially elevated concentrations. There is no pathway for human or environmental exposure to the metals detected in soil because of the depth and surface cover. The small volume of soil material containing elevated metals further limits the possibility of exposure. The SWMU site presents no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
16	High concentrations of pesticides were detected in the soils. An interim RCRA corrective action has been performed at the site, and pesticide-contaminated soils have been removed. SWMU 16 is recommended for no further action under the RCRA corrective action program.
17	Potentially harmful concentrations of hazardous materials were not detected. SWMU 17 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
18	Soil at SWMU 18 is sporadically contaminated with hydrocarbons. Hydrocarbons were also detected in groundwater. Because of the asphalt covering of the site, there is no exposure pathway for human and ecological receptors. A CERCLA process investigation should be conducted in the vicinity of SWMUs 2, 5, 7, and 18 to evaluate the source of constituents detected in groundwater and to evaluate possible remedial alternatives.
22	Potentially harmful concentrations of hazardous materials were not detected. SWMU 22 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
23	Potentially harmful concentrations of hazardous materials were not detected. SWMU 23 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
24	Potentially harmful concentrations of hazardous materials were not detected. SWMU 24 poses no threat to human health and the environment and is recommended for no further action under the RCRA SWMU corrective action program.
25	Potentially harmful concentrations of hazardous materials were not detected. SWMU 25 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
37	SWMU 37 is located in the vicinity of IR Site 11. Potentially harmful concentrations of hazardous materials were not detected in soil or filtered samples of groundwater. SWMU 37 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
40	Soil samples contained trace concentrations of PCBs and pesticides. The Navy has conducted an interim RCRA corrective action, including a limited site excavation and capping of PCB- and pesticide-contaminated soil with an impervious surface. SWMU 40 is recommended for no further action under the RCRA corrective action program.

TABLE 32 (Continued)
SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS
NAVAL WEAPONS STATION CONCORD

SWMU SITE	CONCLUSIONS AND RECOMMENDATIONS
44	Potentially harmful concentrations of hazardous materials were not detected. SWMU 44 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
50	Hydrocarbons were detected in soil and groundwater. SWMU 50 should be transferred to the Navy's UST program and removed from the RCRA corrective action program.
51	Potentially harmful concentrations of hazardous materials were not detected. SWMU 51 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
52	SWMU 52 is located in the vicinity of IR Site 22. Arsenic and lead were detected in surface soil samples. Arsenic and lead did not originate from the SWMU septic tank because the surface soils are located above the septic tank leach field system and because the surface soils containing arsenic are widely distributed at the site. The potential hazards associated with arsenic and lead at the site are more fully evaluated in the RI of IR Site 22. The septic tank and leach field system at SWMU 52 poses no threat to human health and the environment. Because potentially harmful concentrations of hazardous materials were not detected, the SWMU site is recommended for no further action under the RCRA corrective action program.
53	Potentially harmful concentrations of hazardous materials were not detected. SWMU 53 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.
54	Potentially harmful concentrations of hazardous materials were not detected. SWMU 54 poses no threat to human health and the environment and is recommended for no further action under the RCRA corrective action program.

Notes:

CERCLA =	Comprehensive Environmental Response, Compensation, and Liability Act
IR =	Installation Restoration
mg/kg =	milligrams per kilogram
PCB =	polychlorinated biphenyls
PRG =	Preliminary Remediation Goal
RCRA =	Resource Conservation and Recovery Act
RI =	Remedial Investigation
SVOC =	semivolatile organic compounds
SWMU =	solid waste management unit
UST =	underground storage tank
VOC =	volatile organic compounds
µg/L =	micrograms per liter
